Importance: High

The removal CLP account CAN NOT be charged/used for this Delta Shipyard assessment. We are re looking at this site to help the remedial program. If remedial CLP site account can not cover/not available, a contract lab must be procured. There is no flexibility/no R6 funds in the removal CLP account for any use.

John - please let me know your understanding of the CLP account being used at this site. Thank you. Susan

Brenda:

Thanks. From the removal program perspective, we are not allowed to use CLP through the Removal Program because there are no national dollars to do so. I have already expended our allocation for the Removal Program in R6 at the May Cooperage site. Therefore, I will get in alot of trouble if the CLP costs are in any way moved to the Removal Program. HQ has indicated that we must coordinate with them directly before the use of CLP by the Removal Program. I just wanted to make sure that the Removal Program will not be slapped by HQ so I definitely need you guys to pick up the CLP Costs with the Remedial/PreRemedial CLP Allocation.

Thanks

Hi Gary,

Gary As in all things you and I are just worker bees. As you and I discussed, Houston will be analyzing the waste samples and the metals for the sediment and waters. The soils will be going to CLP as long as there is capacity and dollars. I am told we as of today we are good on capacity and dollars. As for as the total cost of the integrated assessment we are sharing costs pretty evenly--you have obligated contractor dollars for collection of samples of about 115,000 and we are covering the analytical (80,000) and Michelles time(20,000). With the exception of our HRS SW samples, all samples benefit both programs and will also aid in cost recovery actions/demonstration of release for RP's. As of now we are good. If the CLP capacity changes you might be asked to pay a portion of the CLP analytical. That's the best disclaimer I can give you. I bragged on you today to Pam---when I was getting the CLP form signed.

Site Name	Week of Sampling	CLP Organic	CLP Metals/CN	CLP Regional Cost Estimate	Houston Lab
Delta Shipyard	6-Aug	49 w VOA, ABN, P/P	66 soil TM+Hg	\$80,648	49 w TM+ Hg
		17 sed VOA, ABN, P/P			17 sed TM+Hg
		66 soil VOA,ABN, P/P			22 waste TM+Hg
					17 waste VOA,ABN, P/P

---

Brenda

Susan wants me to make sure that removal will not be hit up for the delta analytical. Basically, remedial will be absorbing these costs in total.

Thanks  
Gary
